Summary

I am a Software Engineer with 3+ years of experience building web applications and business systems. Experienced in PHP, JavaScript, React, HTML, CSS, MySQL and MariaDB, with a strong focus on UI/UX, backend development and APIs. I have worked on systems for clinics, payments, data management and other business needs. I also have experience with cloud platforms, databases, system integrations and offline-first applications. I enjoy building simple through to complex, reliable systems that solve real problems and make work easier. I am also interested and eager to learn from from different projects.
